

EPS BLOK è il nuovo sistema di cassetta isoterma pre-formata in moduli dritti e già curvati, facile e veloce per il getto di piscine in calcestruzzo. EPS BLOK grazie alla sua leggerezza ed i suoi incastrici che lo rendono impilabile permette un facile trasporto e inoltre ha:

- proprietà isoterme che permettono di mantenere più a lungo la temperatura raggiunta dall'acqua
- maggiore semplicità nell'assemblare le pareti curve
- stampa in polistirene alta densità per pareti diritte e precurvate
- getto di calcestruzzo dosaggio fine densità C25/30

EPS BLOK is the new isothermal formwork system in straight and already curved modules, easy and fast for the casting of concrete pools. Thanks to its lightness and its joints that make it stackable, EPS BLOK allows an easy transport and it also has:

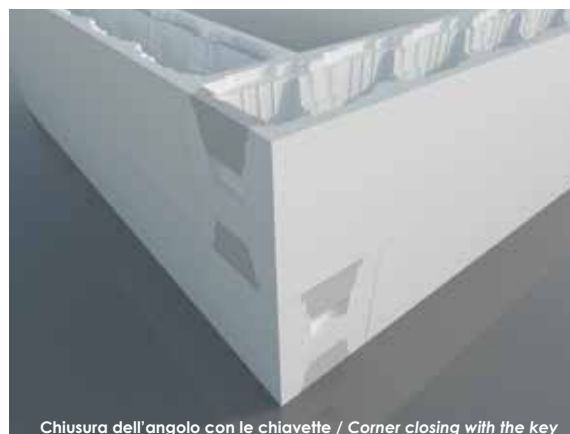

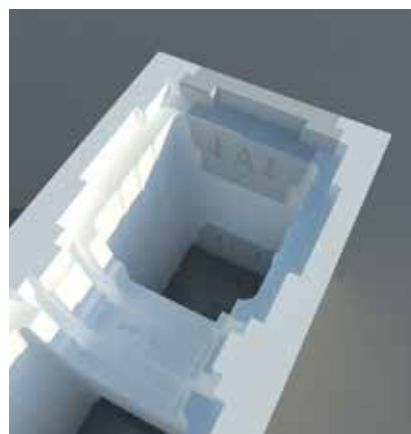

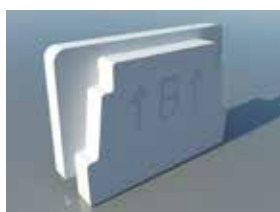

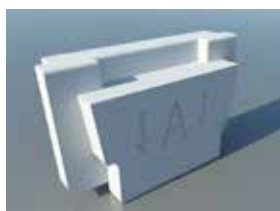

- isothermal properties that allow the pool to maintain the temperature reached by the water for longer
- greater simplicity in assembling curved walls
- molding high-density polystyrene for straight and pre-curved walls
- concrete jet fine density dosage C25/30

EPS BLOK 1000 MODULO DIRITTO / EPS BLOCK 1000 RECTANGULAR FORM

| Codice/ code | Descrizione/description |
|-----------------|--|
| 1064000 | EPS BLOK 1000 dritto in bancali da 39 pz. cadauno EPS BLOK1000 rectangular form in pallets of 39 pcs each |
| 1064007 | EPS BLOK 1000 dritto in pacchi da 9 pz. cadauno EPS BLOK1000 rectangular form in packages of 9 pcs each |
